---

## OBJECTIVE

Aspiring AI & Data Science professional seeking internship opportunities to apply machine learning and data analytics skills to solve real-world problems. I aim to contribute to a dynamic organization, continuously learning and developing my abilities to achieve exceptional results.

---

## EDUCATION

- 2023–2027**     **V.S.B. Engineering College, Karur**  
B. Tech – Artificial Intelligence and Data Science  
**CGPA: 8.62 (5th Semester)**
- 2022–2023**     **TNPL Matriculation Higher Secondary School**  
**HSC – 81.5%**
- 2020–2021**     **TNPL Matriculation Higher Secondary School**  
**SSLC – All pass**

---

## INTERNSHIP

### Infosys Springboard – Virtual Internship 6.0

*Sept 15 – Nov 25, 2025 AI-Integrated Web Tool for Personalized Study Planning (B3)*

- Built an AI-Integrated Web Tool for Personalized Study Planning that adapts to individual learners using AI algorithms and smart web interfaces.
- Developed adaptive study planning features leveraging AI to transform unstructured study habits into tailored, personalized learning experiences.
- Gained hands-on expertise in AI algorithms, web development, and adaptive problem-solving through iterative development and real-world application.

---

## SKILLS & PERSONAL TRAITS

- Python, SQL, Power BI, Tableau, Hadoop, Predictive Analytics, Cloud Computing, Data Pipelines, Node.js, Express.js, TensorFlow, Data analytics
- Self-motivated, Adaptability, Leadership Quality, Team Work, Communication, Logical and Analytical Thinking

---

## PROJECTS

### Student Activity Record System – React, Node.js, MySQL, Socket.io

- Developed a full-stack web application featuring an attendance management system for students and integrated Socket.io for real-time notifications.
- AI-driven planning module that improved personalized study schedule accuracy by 30% to enhance user engagement.

### AI-Powered Personalized Study Planner – React, Tailwind CSS

- Built a responsive front-end application that leverages AI models to generate dynamic, tailored study schedules based on user learning styles. Implemented AI-simulated feedback and an automated flashcard generator, utilizing Local Storage for client-side data persistence.

### Sentiment Analyser – Python, NLP, Machine Learning

- Engineered an end-to-end Natural Language Processing (NLP) pipeline to preprocess, tokenize, and clean unstructured text for multi-class sentiment classification.
- Trained machine learning models using advanced feature extraction techniques within a modular, scalable architecture for custom dataset evaluation.

---

## CERTIFICATIONS

- Cloud Computing, Introduction to Machine Learning – NPTEL Certification (Elite)
  - JAVA TECH - Infosys Springboard
  - AWS Cloud Practitioner Essentials
  - Badges: <https://www.credly.com/users/shobika-s.280cd9fd/edit#credly>
-
